

## **LHA London's launches funding initiative in the Capital with Centrepont Charity**

To broaden its contribution to the support for young people with housing problems in the Capital, LHA London has launched a funding initiative in the form of an annum donation to the CentrePoint charity. This will provide the funding of salary and associated costs for in-house psychotherapy. CentrePoint's therapists are currently peripatetic. However, once CentrePoint's new training centre is complete, they will be based in a purpose-built therapeutic centre in CentrePoint's birthplace, 54 Dean Street, Soho. CentrePoint's first objective is to house the young people referred to them safely and away from the dangers inherent in rough sleeping or adult hostels. The LHA is proud to support such objectives.
